

GBC Motorsports Spartacus: Bigger Tires for Better Performance

Anaheim, Calif. - August 10, 2017 - The GBC Motorsports Spartacus tire just got bigger. With three new sizes hitting the UTV tire market today, the [Spartacus](#) has become the fourth GBC Motorsports tire to be offered in 30-inch and 32-inch sizes.

UTV owners looking for the freedom to tackle even the messiest of terrain need to look no further than the GBC Motorsports **Spartacus**. This robust all-terrain tire was designed to perform in a variety of landscapes, but the loose stuff and the mud is where the **Spartacus** really excels.

The deep lugged tread design allows for maximum traction and efficient clearout of debris, so you can spend less time worrying about the terrain ahead and more time tackling it on four wheels. All the while the **Spartacus** maintains excellent ground contact so that you can forge ahead uninhibited.

When it comes to durability, the **Spartacus** receives high marks across the board. This heavy duty 8-ply rated carcass is extremely resistant to punctures and tears, while the radial construction provides supreme control and low rolling resistance. And with three new sizes bringing the total to eleven sizes, GBC Motorsports has more options than ever before for fans of larger UTV tires.

GBC Motorsports Spartacus - New Sizes

- 28x10.00R14 - MSRP \$155.76 - Now in stock
- 30x10.00R14 - MSRP \$177.18 - Now in stock
